To whom it may concern:

In order to proceed with the examination of the said mark Applicant must submit the following information:

- ☒ 1. Clearly state the goods and/or services in connection with the mark as used or intended to be used in commerce in Puerto Rico. This applies if the Applicant customized the selection of goods or services.

The Application in reference includes a broad and indefinite description of the goods and/or services in which the trademark will be used. A written application must specify the particular goods and/or services on or in connection with which the applicant uses, or has a bona fide intention to use, the mark in commerce. To "specify" means to name in an explicit manner. The identification should set forth common names, using terminology that is generally understood. The identification of goods and/or services must be specific, definite, clear, accurate, and concise. *In re Societe Generale des Eaux Minerales de Vittel S.A.*, 1 USPQ2d 1296 (TTAB 1986), rev'd on other grounds, 824 F.2d 957, 3 USPQ2d 1450 (Fed. Cir. 1987); *The Procter & Gamble Co. v. Economics Laboratory, Inc.*, 175 USPQ 505 (TTAB 1972), modified without opinion, 498 F.2d 1406, 181 USPQ 722 (C.C.P.A. 1974).

Applicant identifies and classifies the goods and/or services as follows:

- "Computer programming; computer rental; computer software consultancy; computer software design; computer system design; computer systems analysis; consultancy in the field of computer hardware; Engineering; Industrial design; maintenance of computer software; material testing; mechanical research; meteorological information; physics [research]; Project studies (Technical); rental of computer software; research and development for others; technical research; testing the

performance of vehicles on roads; weather forecasting; preparing engineering drawing; fault diagnostic services in the field of vehicle parts, engine parts, electronic apparatus, telecommunication apparatus, industrial machines or household appliance; Fault diagnostic services using computers; Fault diagnostic services for auto mobiles featuring computer software for use by independent automotive repair personnel; Fault diagnostic services using computers for automotive parts, namely, automobile transmission; design and development of motor vehicle parts” in International Class 042.

The wording in the identification of goods and/or services needs clarification because it is too broad and could include goods and/or services classified in other international classes. Applicant must clarify the identification of goods and/or to specify the nature of the goods as well as their main purpose and their particular field of use or channels of trade. The applicant may aid in clarifying the indefinite term by following the indefinite subject matter with “namely, [specify goods and/or services by generic or common commercial name and field of use].” Any modification to this wording must identify goods and/or services in properly classified in the original International Class specified in the application for these goods and/or services.

Applicant may substitute the following wording:

- “Computer programming; computer rental; computer software consultancy; computer software design; computer system design; computer systems analysis; **CONSULTANCY IN THE DESIGN AND DEVELOPMENT OF COMPUTER HARDWARE**; Engineering; Industrial design; maintenance of computer software; material testing; mechanical research; meteorological information; physics research; **TECHNICAL** project studies; rental of computer software; research and development **OF NEW PRODUCTS** for others; technical research **IN THE FIELD OF AUTOMOBILES; VEHICLE ROADWORTHINESS TESTING**; weather forecasting; engineering drawing **SERVICES**; diagnostic services in the field of vehicle parts, engine parts, electronic apparatus, telecommunication apparatus, industrial machines or household appliances; **COMPUTER DIAGNOSTIC SERVICES; AUTOMOTIVE DIAGNOSTIC SERVICES FEATURING COMPUTER SOFTWARE FOR USE BY INDEPENDENT AUTOMOTIVE REPAIR PERSONNEL; AUTOMOBILE TRANSMISSION DIAGNOSTIC SERVICES**; design and development of motor vehicle parts” in International Class 042; if accurate.

Be advised that this amendment is illustrative and not exhaustive.

The Applicant is referred to the International Classification of Goods and Services under the Nice Agreement provided by the World Intellectual Property Organization for assistance in describing the specific goods in relation to which the Applicant uses the mark in commerce. For a list of the latest Nice Classification of goods you can access the following website:
